

Serving the Pipeline Industry

Movac provides hydrovac and waste transfer services for pipeline projects. Our services are especially suitable for applications requiring sensitive, non-destructive excavation of buried lines, cables or equipment, or where access is difficult.

Our reputation for providing professional, reliable and cost-effective service is earned from collaborating closely with our clients. We understand the importance of ensuring safety, minimizing disruption on the jobsite and meeting environmental standards.

Services to pipeline companies include:

- back hoe excavation and loading
- dust control
- emergency response
- facility decommissioning
- hydrovac excavation
- ice road building
- industrial water hauling
- piling and test holes
- plant turnarounds
- post hole digging
- skid steer loading
- spill cleanup
- trenching

Our high-performance equipment is promptly dispatched to your jobsite, ready to serve. They include:

- Vacuum Trucks
- Water Trucks
- Hydrovac Trucks
- Trailer Hydrovacs
- Combination Units
- Ancillary equipment
- Back Hoes
- Gravel Trucks
- Onsite Trailer Units
- Skid Steer Loaders

If you are in the early stages of planning a project or are in the midst of completing one, call us for help. We're ready when you are.
